

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of the claims in the application:

1. (Cancelled)
2. (Cancelled)
3. (Cancelled)
4. (Cancelled)
5. (Cancelled)
6. (Cancelled)
7. (Original) A method in a data processing system comprising a document with cells arranged in rows and columns, each cell comprising a formula and a last result, the method comprising the steps of:
 - receiving a plurality of values for a plurality of the cells; and
 - storing the values in the last result of the plurality of the cells such that the values are used during recalculation instead of the formulas and such that each of the formulas for the plurality of the cells can be restored independently of other of the plurality of cells.
8. (Cancelled)
9. (Cancelled)
10. (Cancelled)
11. (Cancelled)
12. (Cancelled)
13. (Cancelled)
14. (Cancelled)
15. (Cancelled)
16. (Cancelled)
17. (Original) A computer-readable medium containing instructions that cause a data processing system to perform a method in a data processing system comprising a document with cells arranged in rows and columns, each cell comprising a formula and a last result, the method comprising the steps of:
 - receiving a plurality of values for a plurality of the cells; and
 - storing the values in the last result of the plurality of the cells such that the values are used during recalculation instead of the formulas and such that each of the formulas for the plurality of the cells can be restored independently of other of the plurality of cells.

18. (Original) A computer-readable memory device encoded with a data structure with entries, each entry reflecting a cell in a spreadsheet that is recalculated by a spreadsheet program which is encoded in the memory device and which is run by a processor, each cell comprising:

- a first storage area that stores a formula; and
- a second storage area that stores a numerical value that temporarily overrides the formula so that the numerical value is used instead of the formula during recalculation.
